

memory

SpTimer.inc

SpTimer.h

sys/time.h

SpTimer.cpp

```
graph BT; SpTimercpp[SpTimer.cpp] --> SpTimerh[SpTimer.h]; SpTimerh --> memory[memory]; SpTimerh --> SpTimerinc[SpTimer.inc]; SpTimercpp --> sys_timeh[sys/time.h];
```

The diagram illustrates the dependencies of the SpTimer.cpp file. At the bottom is a black box labeled 'SpTimer.cpp'. Four blue arrows point upwards from this box to four other boxes: 'SpTimer.h' (a white box with a black border), 'memory' (a white box with a gray border), 'SpTimer.inc' (a white box with a gray border), and 'sys/time.h' (a white box with a gray border). The 'SpTimer.h' box is positioned centrally above the 'SpTimer.cpp' box, while the other three boxes are arranged around it at the top of the diagram.
