

dg::Vector

```
graph BT; P[ dg::Polygonizer ] -.-> V[ dg::Vector ]; linkStyle 0 stroke-dasharray: 5 5; linkStyle 0 label m_kOffset
```

The diagram illustrates an inheritance relationship between two classes. At the bottom is a black box labeled 'dg::Polygonizer'. At the top is a white box with a black border labeled 'dg::Vector'. A vertical purple line connects them, with a solid purple arrowhead pointing upwards towards 'dg::Vector'. The line is dashed for most of its length and becomes solid at the arrowhead. To the right of the dashed portion of the line is the text 'm_kOffset'.
